DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Glass et al (US 6,561,275) or Staudt (US 6,457,528).

The claimed structure reads exactly on the reference's structure when the frangible rupture disk 13 is considered as the "valve" as recited. The rupture disk 13 is designed to burst at a predetermined fluid pressure.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 3, 4, 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glass et al '275 or Staudt '528 in view of Baldridge (US 5,697,442) or Mikolajczyk (GB 2,171,436).

Glass et al or Staudt discloses the invention as claimed except for blade(s) on the external surface of the casing. However, it would have been obvious to one of ordinary skill in the art at

the time the invention was made to provide the well casing of Glass et al or Staudt with such blades as claimed because either Baldridge or Mikolajczyk teach providing a well casing with a stabilizer including such blades in order to maintain the casing centered, thereby providing a cement column of substantially uniform thickness (col. 1, line 48 through column 2, line 6 in Baldridge; page 1, lines 12-21).

Allowable Subject Matter

5. Claims 5-16 and 19-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
